

cards.

Adding/Subtracting/Multiplying

1. Divide the deck of cards in half. Each child should have 26 cards.
2. Each child lays one card face up on the table. The child who correctly yells out the sum, difference, or product first, takes possession of both cards.
3. Game continues until one child has the entire deck of cards.

Sum: $5 + 6 = 11$

Difference: $6 - 5 = 1$

Product: $5 \times 6 = 30$
