

Use two "Dice in Dice" for this game.

Roll both at the same time.

Use the outside numbers for the tens digits and the inside numbers for the ones digit of each dice. Decide which number is the greater number and put that in the first set of boxes. Place the smaller number in the second set of boxes. Then subtract the smaller number from the larger number to get a difference. After five rounds, the player with the highest total sum of answers is the winner ©
